A USD amount is easier. I'll buy the most we can get.

Cheers

Sounds good, btw I'm sending 50k for now so either buy up to that amount or 4k bitcoins, whichever is prefer

Looking forward to the tutorial when u guys get back.

OK cool.

Once the wire is sent, send me a conf and I'll start buying at 6 exchanges to get you the lowest price and not cause the price to go up while I do it. It'll be fun to test this with UFX, thanks for the opp.

I'll get you an overall report once the 5k BTC are bought, so you can see the average price and the leftover USD.

When we get back, we will give you a security tutorial and help you keep them in cold storage.

I personally recommend using a laptop/netbook you never use, or a mac computer where the risk of spyware/malware is less.

If you have a flash drive, we can do the transition using one of our whitelisted office computers.

Thanks.

Hey,

Right now, 5000 BTC = \$56,000 @ ~11.34 per coin.

Not sure what the price will be tomorrow but as we buy the price will go up a little.

Send 65k and I will secure you the best price and give you a check for the buffer amount remained.

Whoever the account owner is, I need a copy of your ID please!
